

434238

To: Dennis Lee Supervisor , DWPC

Date: April 16, 1993

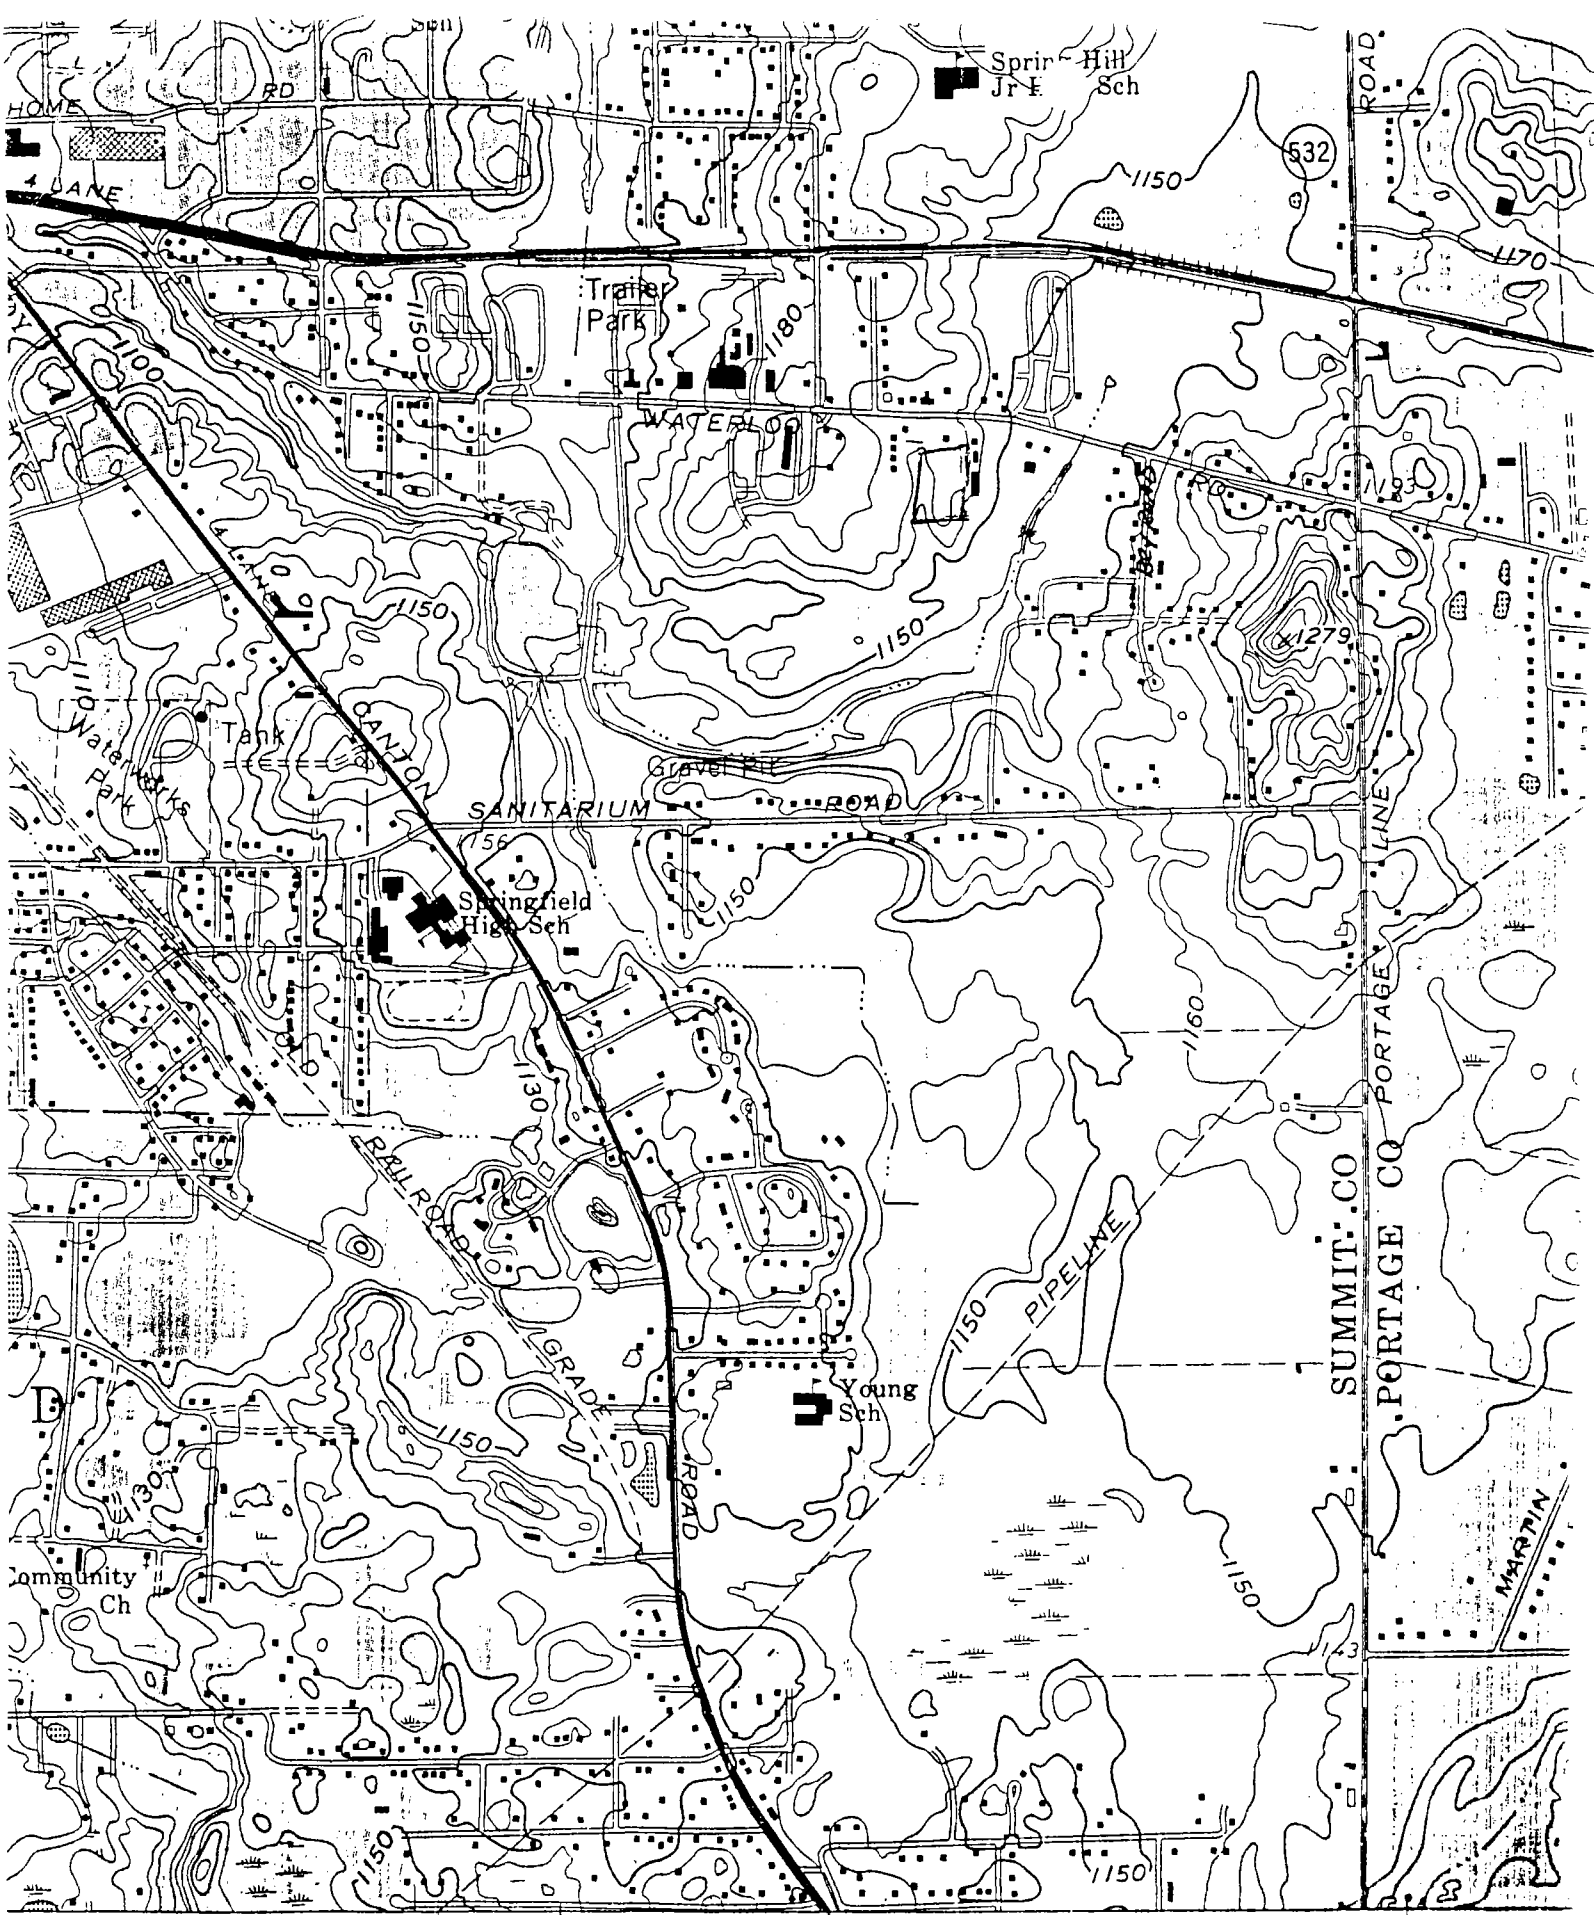

From: Michael Bolas, DERR

Subject: Sam Wiener's Junk Yard, Waterloo Road., Springfield Twp. Summit Co.

DERR is presently involved in assisting the Summit Co. Health Dept. in a potential ground water contamination problem. To date a residential water well has been sampled and an unidentifiable compound was revealed in the analysis with a concentration of seven (7) ug/l. Local residents have complained that the junk yard to the east of Bey Road has "yellow gooky stuff" coming from the hill side. This was also reported by representative Seese during a recent visit to the area.

I am requesting DWPC to assist in the evaluation of this junk yard area as a potential source of contamination. Presently a meeting is setup for April 19, 1993 with Representative Seese and the Summit County Health Dept.

I have attached a map of the area in question. If you need any additional information contact me at 109.
